Personalized Plate Screening Process

- Issuance staff reviews the application to ensure all required information has been provided.
- The plate text choice is reviewed and compared to the “meaning” ascribed to the text choice by the applicant. Up to five plate text choices may be submitted by an applicant.
- If the requested plate text appears to be in compliance with Departmental issuance rules, the plate order is made. The plate order causes an automated comparison to take place against a list of prohibited plate text. If there is no match, the plate order is completed. If there is a match, the first plate text choice is denied and the second or subsequent choice is reviewed.
- If the text choice appears to contain characters that are in violation of Departmental issuance rules but there is no match against the list of prohibited plate texts or it is not possible to confirm the meaning of the text ascribed to the plate by the owner, staff will check online resources such as Urban Dictionary to confirm the meaning or possible meanings of the plate text.
- If the online check confirms that the plate text is in violation of Departmental issuance rules, the 1st message choice is denied and the second or subsequent message choice, if submitted by the applicant, is considered. If the requested plate text appears to be in compliance with Departmental issuance rules, the plate order and automated check against the prohibited plate text list are completed.
- Plate text choices that may violate Departmental issuance rules are reviewed with a team leader, supervisor, or Office Director, as needed.
